Last updated: 5th April 2017.

Species	Comments
Mammals	
<u>Fox, <i>Vulpes vulpes</i></u>	Breeds in Cemetery and seen regularly. Also heard, mainly in the breeding season (winter). Records include: 13/06/2012: Two cubs in long grass (JB & VB). 18/05/2015: A single adult (IS).
<u>Noctule Bat, <i>Nyctalus noctula</i></u>	22/08/2006: seen along Cemetery edge at top of Helena Road (JB & VB). 30/09/1985: 3 - 4 flew over the Cemetery (CR). "Not seen for years" (TN 2014).
Pipistrelles, <i>Pipistrellus pipistrellus</i> / <i>Pipistrellus pygmaeus</i>	Seen every year, including over Helena Road back gardens (JB & VB) and by St. Thomas' Road (TN). Recorded by sight only. A bat detector is needed to distinguish <u>Common</u> & <u>Soprano Pipstrelle</u> bats.
Pipistrelle, <i>Pipistrellus pipistrellus</i>	Confirmed July 2015 by a Norfolk Biodiversity Information Service (NBIS) bat survey on St. Thomas' Road.
Soprano Pipistrelle, <i>Pipistrellus pygmaeus</i>	Confirmed July 2015 by a Norfolk Biodiversity Information Service (NBIS) bat survey on St. Thomas' Road.
Nathusius' pipistrelle, <i>Pipistrellus nathusii</i>	Not recorded in Cemetery but occurred very close by in July 2015. Detected in a Norfolk Biodiversity Information Service (NBIS) bat survey on Connaught Road.
Grey Squirrel, <i>Sciurus carolinensis</i>	Common; breeds in Cemetery. Seen every year. Squirrels have been seen eating crocus flowers (IS) and an <u>EDP article (8th August 2015)</u> suggests they are especially partial to bunches of chrysanthemums and carnations.
Rabbit, <i>Oryctolagus cuniculus</i>	22/09/1999, grid ref TG204086 (NBIS). No longer present.
<u>Weasel, <i>Mustela nivalis</i></u>	According to some Cemetery workmen, weasels were present when there were Rabbits in the Cemetery (TN). 16/10/2007 - One seen running across roadway into cover of bramble thicket TG213087 (SP).

MAMMALS, REPTILES AND AMPHIBIANS

EARLHAM CEMETERY, NORWICH

Species	Comments
<u>Wood Mouse, <i>Apodemus sylvaticus</i></u>	<p>Occur regularly and are often killed by cats. Autumn 2014 – One killed by cat, St. Thomas' Road (TN). 06/03/2006 and 22/01/2005 – Both killed by cats; seen in alleyway between no. 14 and 16 Helena Road and presumably from Cemetery (JB & VB). In mid 2000s a student set small mammal traps in the Cemetery and only caught Wood Mice (TN).</p>
Brown Rat, <i>Rattus norvegicus</i>	Rats occur in the gardens surrounding the Cemetery and TN has seen cats emerging from the Cemetery with rats as their prey.
<u>Roe Deer, <i>Capreolus capreolus</i></u>	Seen in last three years, with a pair seen on 18/04/2014 and one on 22/10/2016 (VK).
<u>Muntjac, <i>Muntiacus reevesi</i></u>	<p>Present in small numbers and seen regularly, though usually shy and retiring. A dead Muntjac was seen by the Earlham Road entrance to the Cemetery in July 2015. Other sightings include two adults, September 2014 (VB) and November 2014 (IS), a single adult 3rd January 2015 (JB, IS), spring 2016 (CP), 25th March 2017 (VB).</p>
<u>Mole, <i>Talpa europaea</i></u>	<p>A mole catcher was employed during the early years of the Cemetery (BBM):</p> <ul style="list-style-type: none"> • 20th February 1857: "Ordered that moles on Cemetery ground be destroyed by Mr. Dye at the charge by him of 7s/6d per annum". • 16th February 1883: Mole catcher employed for £1 per year. • 1894: On 15th June allotment holders (on 40 acre extension to Cemetery purchased in 1892, west of Section K) asked for a mole catcher to destroy moles on their allotments. 20th July 1894: Mr. Fitzpatrick, Cemetery mole catcher, will be paid 20 shillings per annum to do this. <p>Moles are no longer present in the Cemetery.</p>
<u>Hedgehog, <i>Erinaceus europaeus</i></u>	<ul style="list-style-type: none"> • One seen in late March 2017 and in 2015 in a garden on Earlham Road, backing onto the Cemetery (ML). • One seen regularly in the evening heading into the section of Cemetery west of Farrow Road by Gypsy Lane, July 2016 (MH). • Seen in the middle of the afternoon on 27th September 2015, a single individual. Didn't look very healthy - some eye damage and not that plump (IS). • Seen by St. Thomas' Road, July 2014 (TN). • Several records from 1992 to 1998 in garden of 12 Helena Road. Hedgehogs came into the garden from the Cemetery. Last records were 2 on 19/05/1998 and 1 on 09/08/1998 (JB & VB).

MAMMALS, REPTILES AND AMPHIBIANS

EARLHAM CEMETERY, NORWICH

Species	Comments
Reptiles	
<u>Slow Worm, <i>Anguis fragilis</i></u>	One record, 03/08/2001 (JB & VB) – On pavement of Helena Road, moving rapidly towards Dereham Road. Transferred to back garden of 12 Helena Road. Probably came from the Cemetery, the nearest green space.
Amphibians	
<u>Common Frog, <i>Rana temporaria</i></u>	Breed in pond in Memorial Garden (PH). Seen in the Cemetery at the back of Helena Road. Breeding in garden ponds at 12 and 14 Helena Road until at least 2013 (JB & VB). Have bred in garden ponds on St. Thomas' Road since at least 1992 (TN 2014). Frogs also breed in garden ponds on Earlham Road (ML 2017).
<u>Smooth Newt, <i>Lissotriton vulgaris</i></u>	May breed in pond in Memorial Garden (PH). Currently breeding in garden pond on St. Thomas' Road (TN). In pond at 12 Helena Road until at least 2013, where they arrived around 1999 (JB & VB).
<u>Common Toad, <i>Bufo bufo</i></u>	Singletons recorded in garden at 12 Helena Road in early 1990s (JB & VB) but not seen more recently.
